

SWEDISH CLOTHS

A Scandinavian Kitchen Essential!

Swedish dish cloths are a great, eco-friendly alternative to sponges and paper towels. Soft and durable, the cloths last up to 6 months. Super absorbent cotton and cellulose fibres enable each cloth to soak up 15x its own weight. Wet the cloth and wring out to use. Ideal for all household cleaning projects, leaving a streak free finish.

For daily elimination of bacteria, the damp cloth can be cleaned in the microwave for one minute. For a deeper clean, the cloths can go into the washing machine, or in the top rack of the dishwasher. Our colourful, water-based print designs also resist bleaching agents without compromising the fun, bright images.

These Swedish dish cloths are 100% biodegradable due to the natural fibre composition, and our use of watercolour based print. Once worn out, the cloth should be composted.

There are endless uses for these cloths! Great for general household cleaning, from kitchen clean-up to bathroom scrubbing. The cloths leave windows and mirrors streak and lint free, and polish silver without being abrasive. Create your own favourite use!
