

*The Ultimate Outdoor Living Space to
Unite Family and Friends*

MADE IN CANADA

The Kelowna by Visscher is built with outdoor living in mind, combined with the protection of being fully-enclosed. Huge windows let the breeze in, and screens keep the bugs out. This model has lots of features with a mid-size footprint that suits almost any yard. With the hinged vinyl window kit, you can manage your climate, no matter what it's like outside. Add a bay kit and watch your living area grow!
